COMMERCIAL AND MONEY MATTERS.

For sales of Stocks, &c. see Fourth Page.

The tendency of prices was downward to day, and the Fancies fell off somewhat. Treasury Notes were also dull and declined to 3½, a fall of ½ per cent. from yesterday's prices. We understand that Mesers. Corcoran & Riggs sold \$700,000 of six per cent. Treasury Notes at Boston yesterday at 4 per cent. premium.

The Exchange Market continues to rise, and tures. France are 5.40. The supply of Bills in market is moderate, and the inquiry from importers for remittances on account of the specie recently imported, is considerable. A farther advance is looked for before the steamer leaves. At the present rate there is no profit

The Freight Market is rather more active, but rates are low. Flour to Liverpool is 3a 23a 6d. Grain tions. The New-Hampshire was taken at 30c to load Wheat in bags at Philadelphia for Havre. cover some 43,000 square feet or an acre of ground—
The Boston Advertiser says.

Whoever will take the trouble to ascertain the quantity of Railroad fron required in the country the present year and the amount of the manufacture, will see that the cemand must be beyond the supply. This will undoubtedly lead to considerable importations of Railway bars the present and ensuing year. American iron is said to be worth from \$7 to \$10 per ton more than the Iron imported from Great Britain.

Experience has shown that the best quality of fron has been the most economical for Railway uses in England, and there is a difference of from \$5 to \$10 in the price of the different qualities in the English market—The quotation prices for export are for the common or cheap Iron. The manufacturers of Railway Iron in this country get orders readily for all they can turn out at about \$7 per ton, above the present cost of importation. This is owing to the superior quality of the Iron.

TO THE PUBLIC.

I FEEL IT MY DUTY to correct a misstatement which Lappeaced in your paper of the l'Ith instant, retailve to a sont in the Supreme Court, viz. "Augusta Browne ra. First Prea yeterian Charch of Brooklyn, sees the Trustees for an alleged balance of Salab due her as Organist." Is it not most improbable that I would have the confidence to sue one of the richest and most infraential Churches in the State, other receiving the highest testimodals of approbation for my services during there years and three months, even seler I announces my resignation for no other reason but not being paid the balance of my salary, if I had not thee, as I now have, the strongest assurance of the justice and vaining of my claim. As to myself, I never personally made any contract or agreement with the Church, my father, as my agent, made one with Mr. C. P. Stitth, then Mayor of Brooklyn, and never made a second, although it may appear that the Trustees do not recognize Mr. Smith's authority were to make it. Mr. Smith steleithan the Church had never paid to an Organist previously more than \$300 at of the fands of the Church, but at the end of the year (should the members be opposed, as many of them distilked an organ,) the sum of \$400 should be made up \$-\$300 s year in quarterly payments, "with additional sum as the Trustees may think just and bie, say from \$50 to \$100°; the receipts were sent, by the meetings of all darks and the produces.

The whole sum was to have been \$500 per annum.
